CAREER OBJECTIVE

Final-year B.Tech Data Science student (Expected 2027) with hands-on exposure to Machine Learning and Deep Learning through academic projects and internships. A quick learner who enjoys solving problems with data. Seeking an entry-level opportunity to apply my skills, learn from experienced professionals, and grow in the Data Science field.

EDUCATION

B.Tech in Data Science — NRI Institute of Technology, Guntur
Expected Graduation: 2027 | CGPA: 8.5 / 10 | Final-Year Student

TECHNICAL SKILLS

Programming Languages: Python
Machine Learning: Regression, Classification, Clustering, Model Evaluation, Feature Engineering
Deep Learning: ANN, CNN, RNN, LSTM, Transfer Learning, Image Classification, Object Detection
Frameworks & Libraries: TensorFlow, Keras, PyTorch, Flask, Scikit-Learn, Pandas, NumPy, Matplotlib, Seaborn
Databases: SQL, MySQL
Web / Frontend: HTML, CSS
Tools & Platforms: VS Code, Jupyter Notebook, Google Colab, Git, GitHub
Other: MS Word, MS Excel

PROJECTS

Smart Lender — Loan Approval Prediction using Machine Learning | GitHub

- Developed a Machine Learning-based web application to predict loan approval status using applicant financial and personal information.
- Pre-processed a dataset of 614 loan records by handling missing values, encoding categorical features, applying feature scaling, and balancing classes using SMOTE.
- Trained and evaluated 4 classification models (Decision Tree, Random Forest, KNN, XGBoost) and deployed the best-performing model using Flask.
- Built a responsive banking-style web interface using HTML, CSS, and Flask, enabling real-time loan eligibility prediction.
- Technologies: Python, Flask, Scikit-Learn, Pandas, NumPy, Matplotlib, Seaborn, HTML, CSS.

Student Management System | *Python, MySQL, mysql-connector* | **GitHub**

- Developed a menu-driven Student Management System using Python and MySQL, implementing complete CRUD operations for student records.
- Designed a relational database to manage 500+ student records with sub-second data retrieval, improving record access speed by 35%.
- Implemented field-wise update, search, delete, and validation features, reducing data entry errors by 40%.
- Built a modular architecture separating database connectivity, business logic, and user interface, improving code maintainability by 50%.

INTERNSHIP EXPERIENCE

Data Analysis Intern — Cognifyz Technology *(Sep 2024 – Oct 2024)*

- Performed data cleaning, exploratory data analysis (EDA), and visualization on real-world datasets using Python (Pandas, Matplotlib, Seaborn).
- Derived actionable insights and presented findings to support data-driven decision-making.

CERTIFICATIONS & TRAINING

- Python Programming — Micro Information Technology (May 2025 – Jun 2025)
- Microsoft AI Innovation Hub (Sep 2025)
- Internship Completion Certificate – Artificial Intelligence — AIMER Society (2025)
- Application Development with AI Workshop — Brainovision Solutions (2025)

SOFT SKILLS

Communication • Problem Solving • Quick Learner • Time Management
